

Despite having an experience why after 50,
person does not get job. What are the reasons
And what should be done

Vocabulary: upsurge, snag, causation, breakthroughs,
breakthroughs, cutting edge technology, gender, blindfold,
authority, telecommuting

Despite the awareness there has been a
dramatic upsurge
in the depressing
attitude of workers
after half a decade
of age and
failed to achieve
job. But this
snag can easily
be overcome if
dealt properly
by authority
and
of course masses.

Inevitably, the leading
causation of his issue
is gap of technical
knowledge of youth
and old aged.
Being a computer
literate and open
for round the clock
youngsters have taken
the place. To
exemplify, today
breakthroughs
need for better
output in office
ergo, due to
mental agility
neither cutting
edge technology
nor leave attitude
to break and
never allow offices
to incur damage
group.

Another popular
belief is that
his retirement is
close as well as
expensive employee
organization.
To quote an instance
at such age not cope
up with office update
his domination not
match - working
steadily. However
this problem can
be solved by
reserving jobs at
certain positions
as a trainer - surely
they would share
knowledge,
which would be
beneficial.

Another possible
solution?
↳ loans - less rate
granted to such
age group - so
they start own
business with
experienced skills
which would
↳ contribute
employment surge
on the top of it,
definitely
Resultantly, Nation
↳ trade would high
↳ skillful people
would backbone
↳ shield
nation's economy.

In an inference
I am sure that
↳ the authority - not
blindfold - 50 year
age group opportunity
↳ ~~as in man~~
with working few hours
↳ ~~to~~ telecommunity
definitely - a change
↳ to employ them
so such people can
never be suffered
from any obnoxious
situation.
