

Radio is one of the oldest devices. Do you think its advantages outweigh disadvantages?

Vocabulary

Of late, in communication technologies the existence of radio is still witnessed. Some avowedly embrace that such technical tool can keep its name forever. While others counteract that new breakthroughs are more powerful. Though I minded uphold this portable device has monopoly worldwide. [Proliferation]

Certainly, But against <sup>by saying</sup> ~~emphasise their perspective~~ such technological tool is one of the oldest gadgets as well as pocket friendly. To exemplify, being portable gizmo people of all strata get attracted and accept this conventional equipment. Resultantly, masses feel very attached to listen radio and rejuvenate themselves.

Superficially, another <sup>of this</sup> ~~imperative outlook in favour~~ where television and newspapers are failed to reach ~~radio~~ <sup>radio</sup> this technological advancement ~~radio signal can be~~ <sup>have reach</sup>. To <sup>quote an instance</sup> even in remote areas the frequency transmits so effectively that folks easily <sup>breaks mounting</sup> ~~rejuvenate~~ <sup>rejuvenate</sup> the programmes and ~~feel~~ <sup>become</sup> the part of it.

Conversely, opponents do not agree with the government's notion by saying that

today posterity do not welcome radio and consider it, outdated as it is, an audio aid only so being a techie they do not feel comfortable with such technology.

However, I am strongly convinced that radio technology was invented in 2<sup>nd</sup> world war and till day it is a great source of transmission from air traffic controllers to soldiers and believed that <sup>any</sup> alien civilization ~~existence would~~ then it would communicate through radio technology

In an inference despite to new cutting edge technology has evolved the world but I am sure that radio <sup>I</sup> equally has capability to revolutionize the world in another form.
